

Cross Reference Guide for Common Soybean Varieties – 2024

Important: Two varieties that are genetically the same may not perform the same side by side in the field due to differences in environmental conditions and management practices among seed increase production fields. How the seed is handled and processed between the time of harvesting in the seed increase field and planting in a grower's field also influences overall seed quality, which in turn can affect the performance of two varieties that genetically are the same.

Information used to develop this listing was obtained from multiple sources including university and seed company resources. This information was collected at random from regulatory samples, thus not all varieties that are the same as other varieties may be listed. In addition, some varieties listed are no longer sold commercially.

Information contained within this publication was compiled by Jeremy Ross, Extension Agronomist – Soybean/Professor, University of Arkansas Division of Agriculture. Please contact Jeremy if you have any questions or comments (jross@uada.edu or 501-237-5523).

Maturity Group IV Varieties (Conventional)		
Variety of Interest	Same Varieties as the Variety of Interest	
Armor 49-C3	GoSoy Leland	Progeny P5191
GoSoy Ireane	USG Ellis	
GoSoy Leland	Progeny P5191	Armor 49-C3
Progeny P5191	Armor 49-C3	GoSoy Leland
USG Ellis	GoSoy Ireane
