

## MIDSOUTH CROP ENTERPRISE BUDGETS FOR 2025

Each year, the Midsouth States' land grant universities publish crop enterprise budgets that provide estimates for costs and returns associated with the myriad crop production enterprises in the region. These budgets are compiled to assist producers and other decision makers in choosing management strategies and inputs that are available and may be used to produce crops in the region. The budgets that can be accessed in the following links are guides that can be changed by a producer to match the specific requirements and production capability of a particular site.

Budget estimates for specific soybean cropping systems in Arkansas, Louisiana, Mississippi, southeast Missouri, and Tennessee can be accessed through the following links.
